

Bright coffee shop sales

**This is an analysis based on the
on the
Historical transactions of the shop**

Top Revenue Drivers

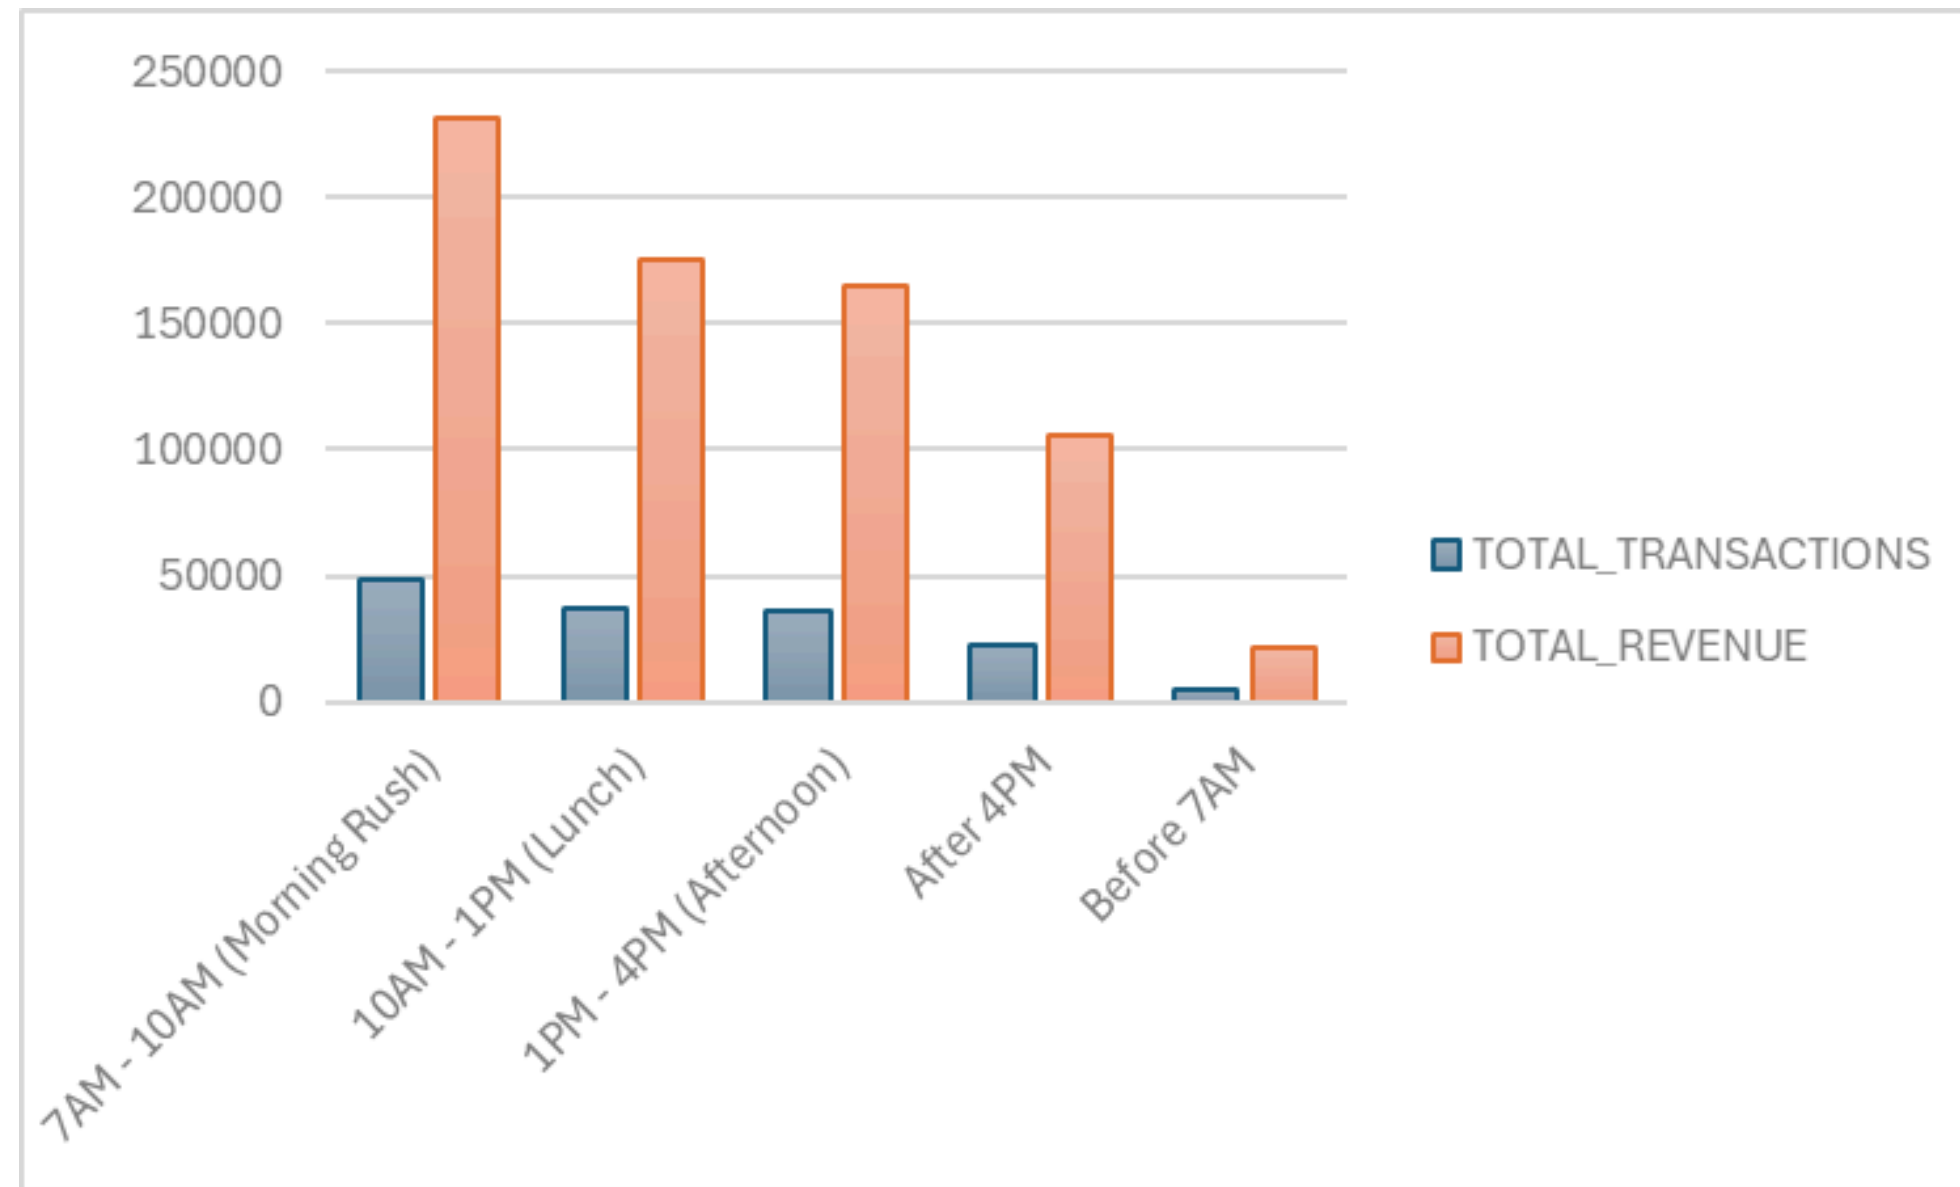

The Logic:

The total money made per product type.

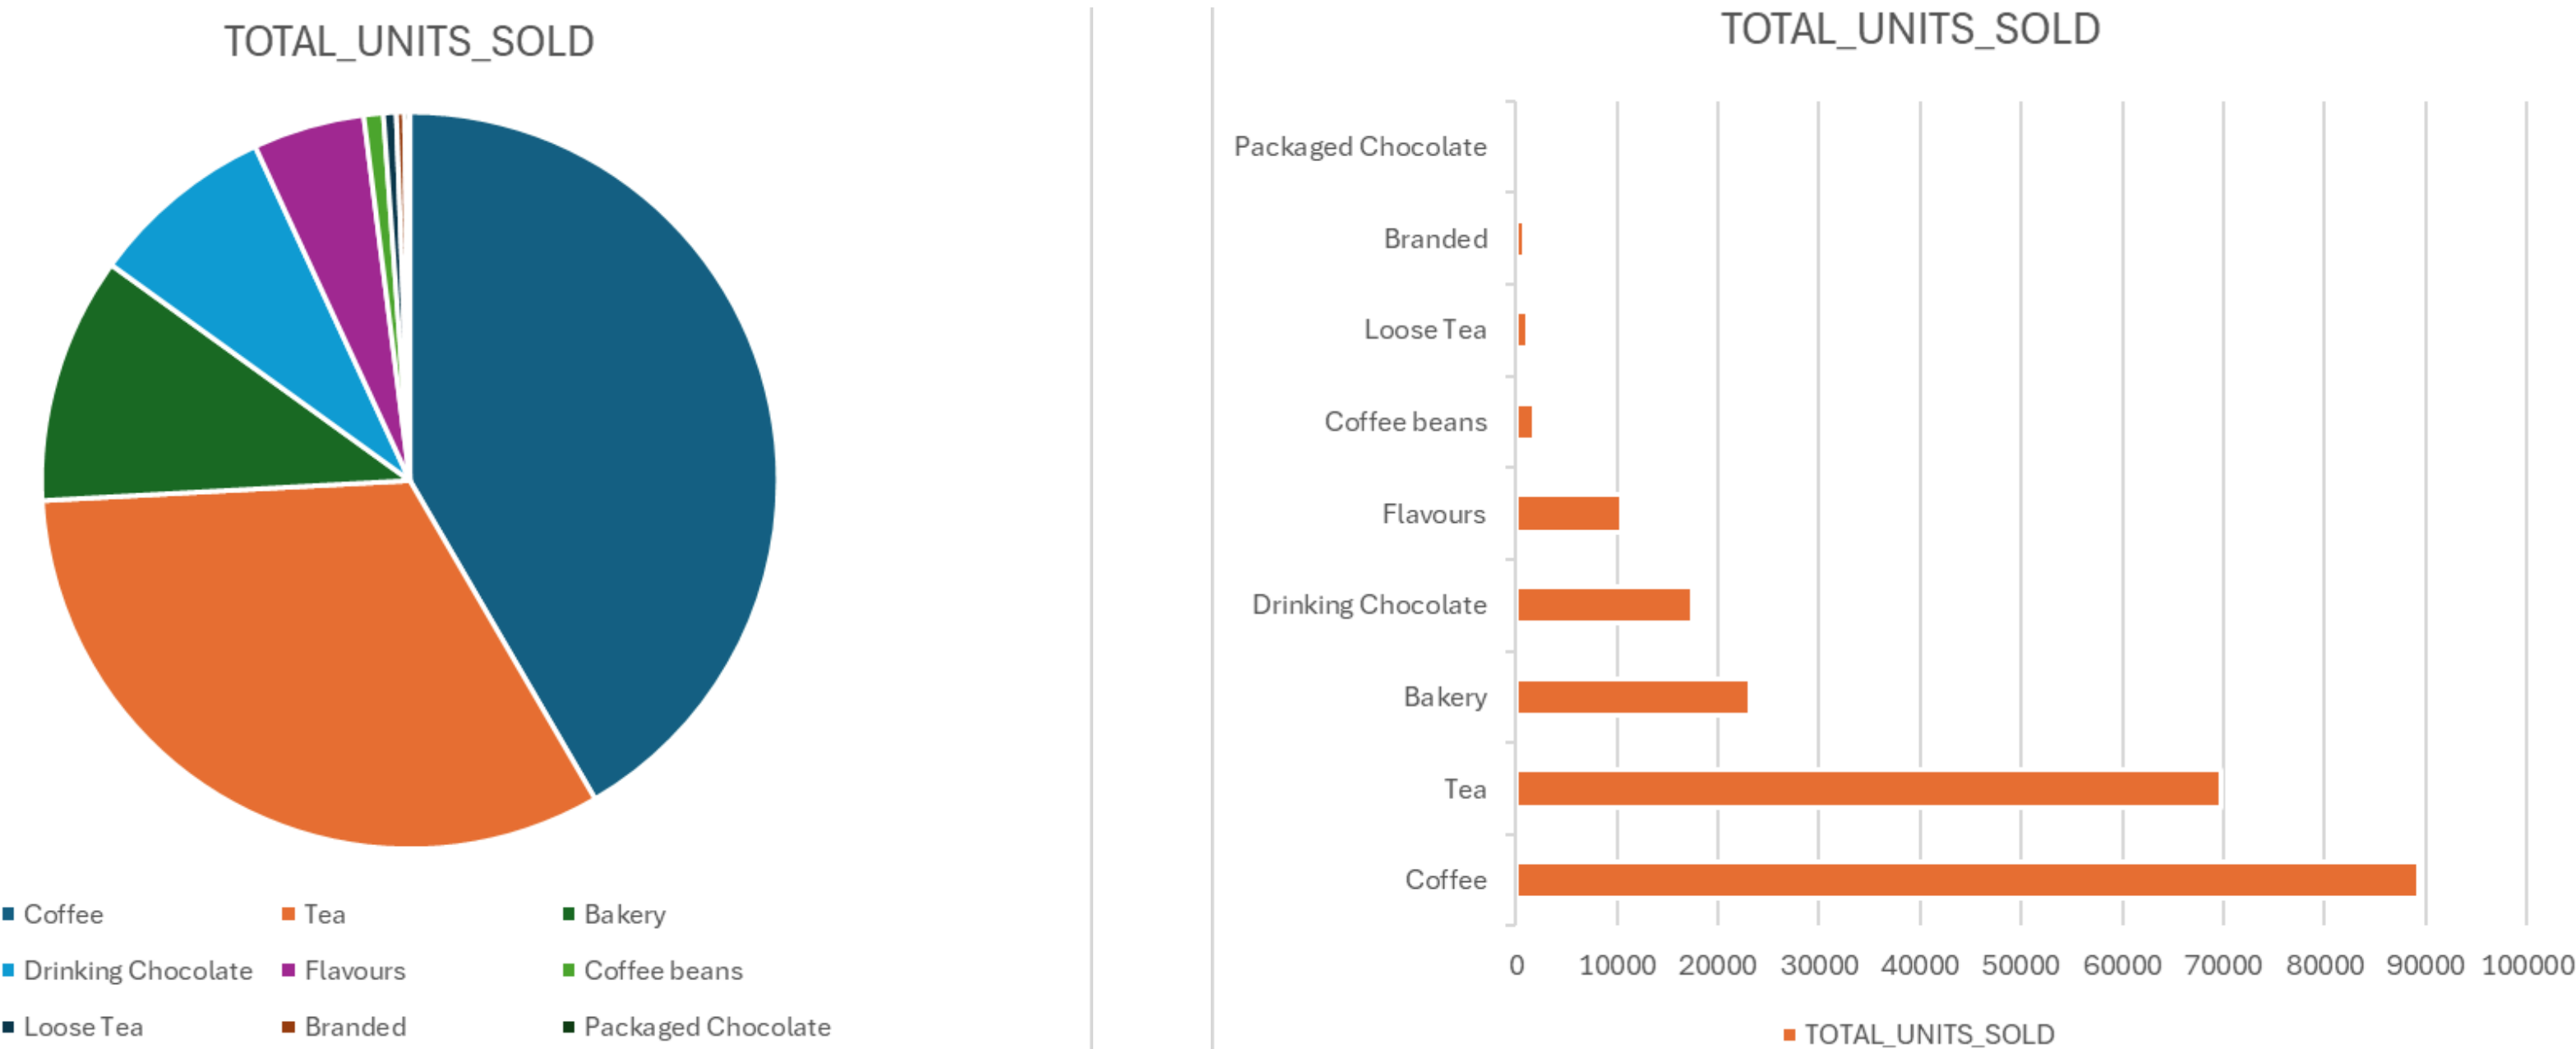

Peak Operational Hours

This is to identify which times of day have the highest sales or foot traffic.

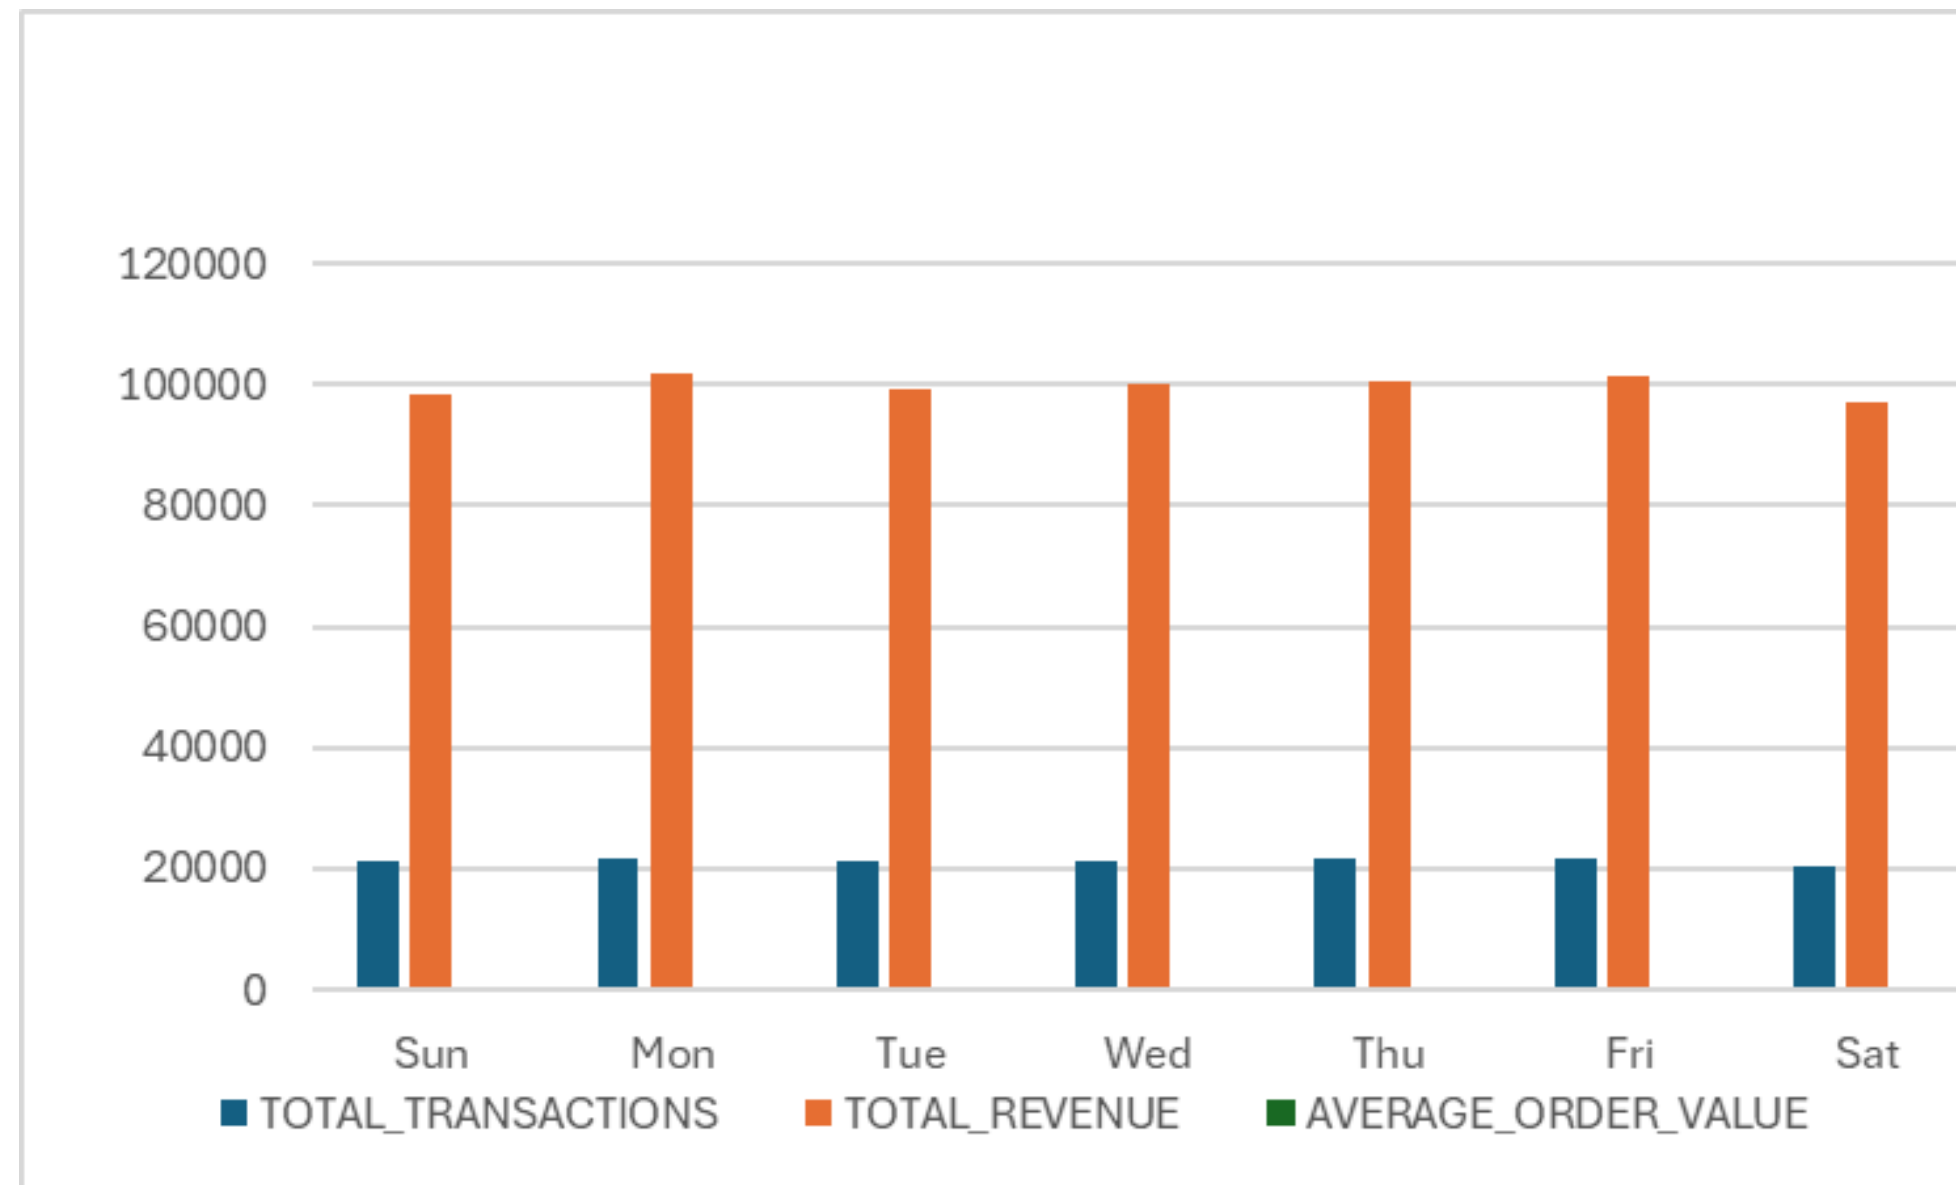

Sales Volume (Best Selling Categories)

The Logic:
We need to see which items sell the most physical units (regardless of price).

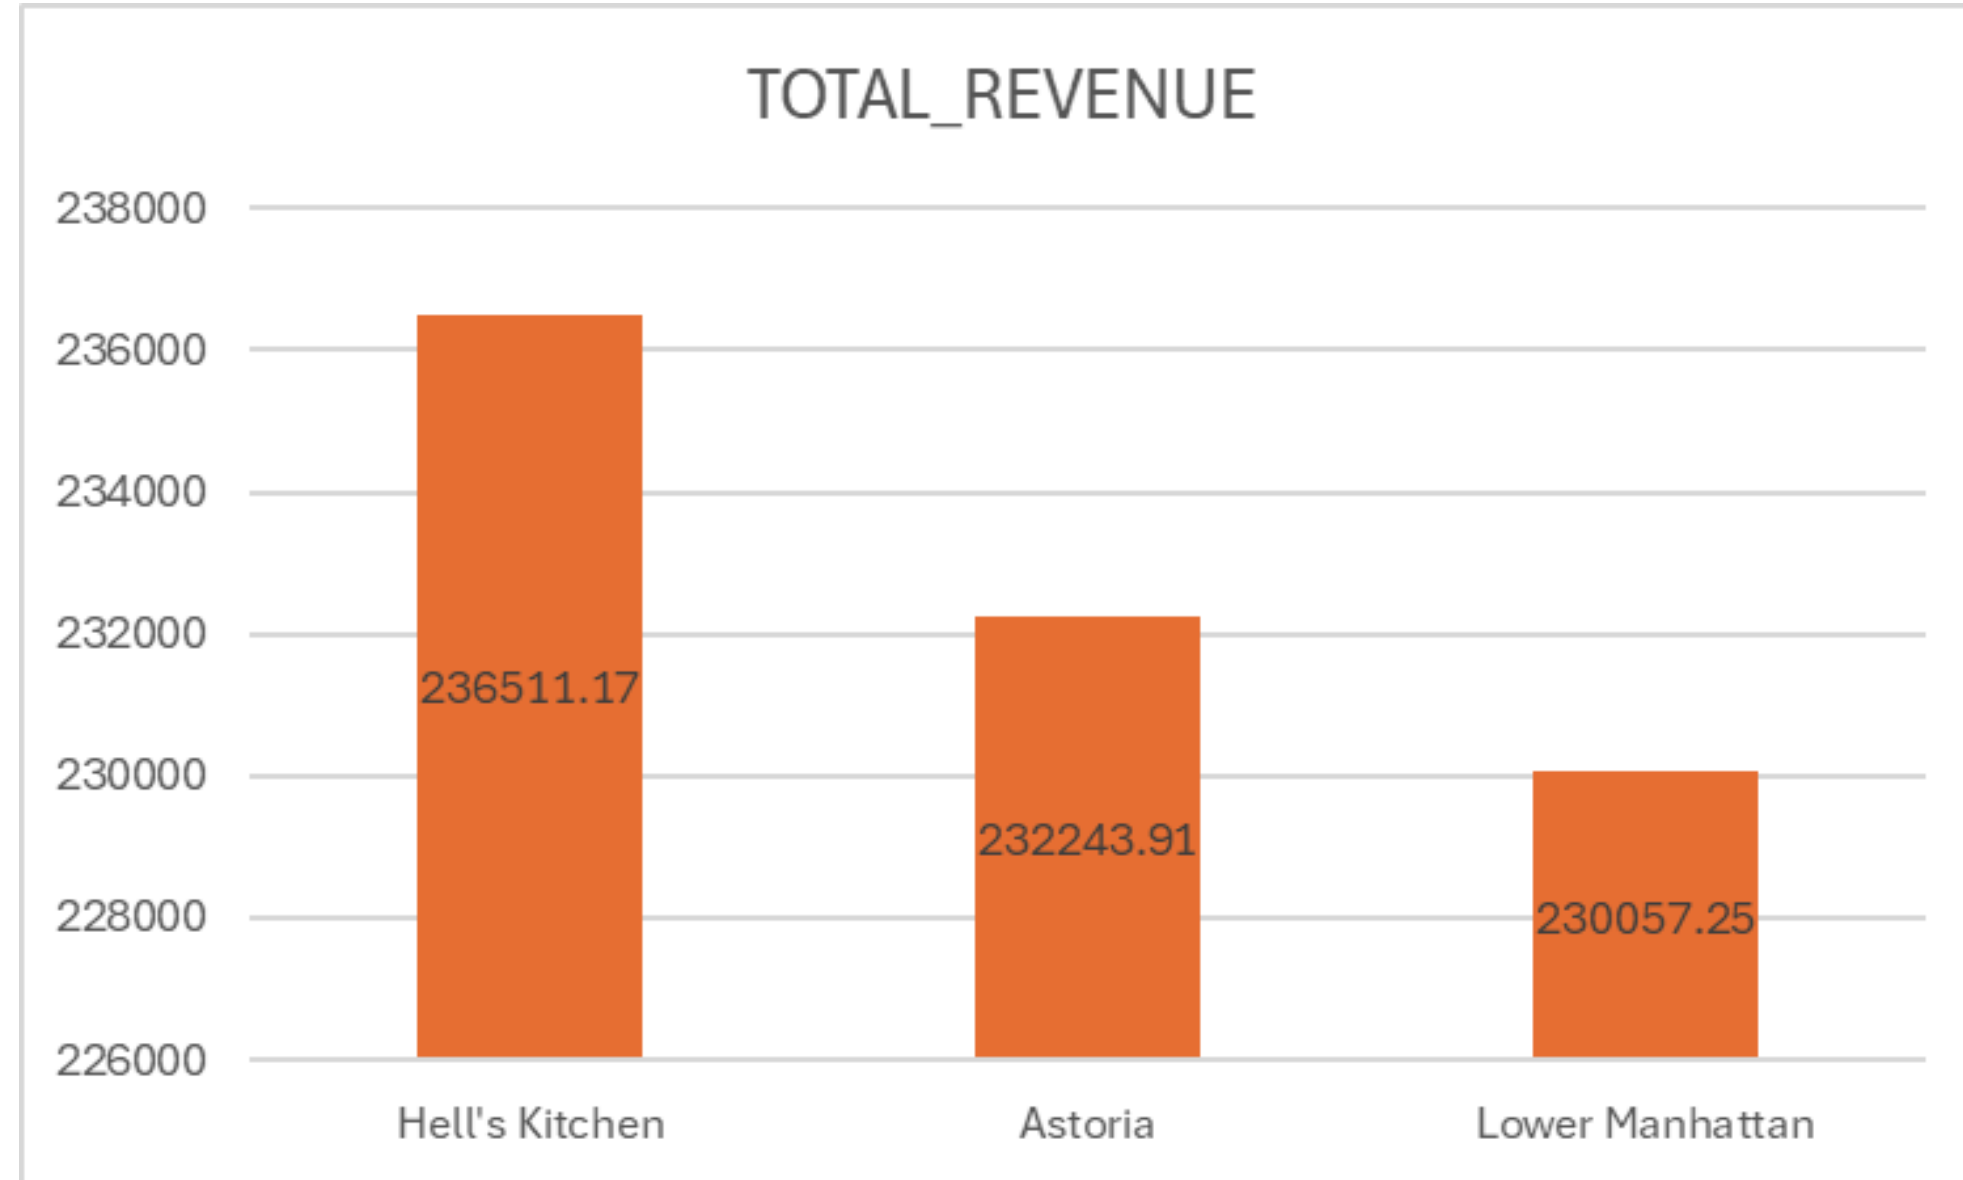

Weekday vs. Weekend Performance

The "Why": Understanding if the shop is a "commuter spot" (busy M-F) or a "hangout spot" (busy Sat-Sun) helps with staffing schedules.

TOTAL REVENUE PER STORE

Title: Strategic Roadmap & Key Takeaways

1. Operational Efficiency

Action: Reallocate staff schedules to align with the 8:00 AM – 10:00 AM rush.

Goal: Reduce wait times and increase throughput during peak revenue hours.

2. Revenue Optimization

Action: Launch a "Happy Hour" (20% off) campaign between 3:00 PM – 5:00 PM.

Goal: Convert slow operational hours into revenue-generating windows.

3. Inventory Control

Action: Increase stock of [Insert Top Coffee Name] by 15% and reduce low-performing bakery items.

Goal: Eliminate stockouts on best-sellers and reduce waste.

Bottom Line: By implementing these data-driven strategies, Bright Coffee Shop can expect to increase weekly revenue and customer retention.
